SUMMARY

Computer Engineering graduate based in Istanbul with a strong foundation in software development, Object-Oriented Programming, and Machine Learning. Experienced in developing real-world applications such as Mobile ADAS, Traffic Sign Recognition, and Vehicle Detection using YOLO. Proficient in Python, C++, and Java, complemented by practical hands-on experience through national internships. Passionate about building innovative technology solutions and continuous learning.

EDUCATION

Ankara Yıldırım Beyazıt University B.S. in Computer Engineering	Ankara, Turkey Oct 2021 – Oct 2026
---	---------------------------------------

EXPERIENCE

Summer Intern – Directorate of State Airports Authority (DHMİ) <i>National Internship Program (Ulusal Staj Programı)</i>	Atatürk Airport, Istanbul, Turkey Aug 2026 – Sep 2026 (1 months)
Summer Intern – Directorate of Information Technologies <i>Network Administration, ASP.NET Core MVC, Entity Framework Core, C#</i>	Selçuk University, Konya, Turkey Jul 2026 – Aug 2026 (1 month)

PROJECTS

Istanbul Earthquake Assembly Area & Risk Analysis <i>Python, Scikit-learn, K-Means, DBSCAN, Folium, Pandas</i>	May 2026
- Clustered earthquake assembly areas and risk zones in Istanbul using K-Means and DBSCAN. - Optimized cluster configurations via SSE and Silhouette coefficient evaluation. - Built interactive risk maps with Folium to visualize assembly locations.	
OTT Viewer Retention & Drop-off Analysis <i>Python, Scikit-learn, XGBoost, Pandas</i>	Jan 2026 – Feb 2026
- Built an ML pipeline to predict viewer drop-off risk (Low/Medium/High). - Compared 8+ algorithms, achieving best performance with XGBoost. - Applied Class Weighting and Threshold Tuning to handle imbalanced data. - Ran Feature Importance analysis to identify key engagement drivers.	
Mobile ADAS (Advanced Driver Assistance System) <i>Python, YOLO26n, Machine Learning</i>	Oct 2025 – May 2026
- Trained a unified real-time YOLO26n model for Traffic Sign Recognition and Vehicle Detection. - Built optimized driver alert mechanisms for mobile deployment.	

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C, C++, C#
- Machine Learning:** YOLO, TensorFlow, Pandas, Matplotlib
- Frameworks & Tools:** ASP.NET Core MVC, Unity, Git/GitHub
- Web Technologies:** HTML, CSS, JavaScript
- Languages:** English (Professional)

CERTIFICATIONS

Algoritma ve Veri Yapıları İleri Seviye – BTK Akademi	2025
Uygulamalarla Nesne Yönelimli Programlama – BTK Akademi	2025
JAVA ile Programlamaya Giriş – BTK Akademi	2025
Python Programlama Dili – BTK Akademi	2025
C Programlama Dili – BTK Akademi	2025

INTERESTS

- Game Development (Unity), Machine Learning, Chess.
